COVER LETTER

Dear Sir / Madam,

For me and my family, cycling is a way of life and part of my DNA. I am a father of 4 and a husband to my wonderful and loving wife. In personal life, I am a very passionate cyclist, and my passion has been cascaded down to all my children, my wife and my broader family and friends. Both, recreationally and as part of the sport.

I have been the President of the Slovenian Cycling Federation (herein "SCF") since 2012. During my presidential tenure, my team and I have executed significant financial restructuring of the SCF, which back in 2012 when I took the presidency over from my predecessor, was significantly in negative number. With a true team effort and determination, we have managed to successfully complete the turnaround and we are now producing positive operating results for the 4 year running. The financial position of our SCF is now sustainable and long term viable, which set a robust foundation for future integral support of cycling development in Slovenia.

We are seeing a continuous trend of growing cyclist numbers in Slovenia in both segments cycling for all and professional sports. It is a broader public perception, that cycling has become a national sport in Slovenia in the last couple of years.

With my team, we have managed to raise some significant funding for the SCF in order to further strengthen the longer term financial viability of our federation and promotion of sport in the country and broader.

During my tenure at the helm of SCF, Slovenia has established itself as part of the global cycling elite, which is underlined by the achievements in the Road man category and other disciplines. (Just mentioned few of the best from the best; 3th place GC on Giro 2019, 1st and 3th place GC on Vuelta 2019, 1st & 2nd place GC on TdF 2020, 1st, 3th & 4th place on Classic Liege Baston Liege 2020, 1st place GC on Vuelta 2020).

As part of my SCF presidency, I am also an active member of the Slovenian Olympic Committee's executive board.

We have built an integral working relationship with the Slovenian government in the organization of road races and with the municipalities in respect of the big international competitions such as the European Championships in Downhill (Maribor, Slovenia).

I have been an Ambassador of SAFETY ON BIKE project, which involves over 100 elementary schools in Slovenia and over thousand children. SAFETY ON BIKE promotes children safety awareness in cycling and promotes cycling as a sport from a very young age.

It is my mission on a daily basis, to promote cycling as part of the general public awareness and daily routine to utilize bicycle as a main transportation tool.

I thoroughly believe that together, we can further promote the cycling in other parts of the World across multiple levels (recreational, professional and sustainable development).

It would be a privilege and an honor, to actively participate as an active member of the UEC Management Board.

Tomaž Grm
